DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Luke Frame House is located on Hanover Street in Luke.

The irregularly shaped building is two and one-half stories tall and four bays wide. Wall construction is frame with clapboard siding and angular imbricated shingles. The shingles form a band around the entire building at the second story which flanges outward, and are also located in the gable ends. The building rests on a high stone foundation of random rubble with a plain water table. The gable front roof is covered with asphalt shingles. Eaves consist of a boxed cornice, soffit, bed mould, frieze, and decoratively sawed brackets. One gable end on the northeastern facade has stick-like bargeboard. The original tall brick chimney has an intricately corbeled cap and two chimney pots. Two gable roofed wings extend from the main block of the building on the northeast and southwest. These wings are abutted by two story three sided bay windows. An addition on the northwest might have been a two story porch which has been enclosed. Other additions include a small rectangular structure added onto the second story which is supported by a tall wooden post and a rectangular addition on the southwest.

The pedimented main entrance, offset on the southeast includes a one light transom, double doors of two panels each (one rectangular and one semicircular arched) and ornate original hardware. Pedimented windows are one over one and two over two light sashes with decorated sash frames and chamfered jambs, some are in pairs. A wraparound veranda on the southeast has a hipped roof covered with ribbed tin which is supported ten chamfered wooden posts. Baluster are turned. A gable in the porch roof is located above the offset entrance.
